

Submissions received through EPA website for Esso Australia Pty Ltd

Public and interested third party submissions received between 16 March and 13 April 2022 relating to Esso Australia Pty Ltd Development Licence Application.

ID	Post code	Who are you representing in your submission?	Do you object to the proposed development activity?	Provide your submission comments	Air emissions (including dust)	Odour emissions	Noise emissions	Greenhouse gas emissions and climate change impacts	Impacts on land	Impacts on groundwater	Impacts on human health	Waste management practices	Monitoring and reporting of emissions	Do you have any suggestions or proposed conditions for how your concerns could be dealt with?	My submission has supporting attachments
1	3915	Myself	I support the proposal subject to conditions	.	High concern	High concern	High concern	High concern	High concern	High concern	High concern	High concern	High concern	For them not to be built.	No
2	3915	Myself	I object to the proposal	Having suffered from generator caused infra-sound before I object to this proposal. It is difficult to predict the distance, atmospheric and ground table conditions infra-sound travels. The last time this occurred to me, my complaints ended up in state parliament, the Ministers advice was for me to leave the country, odd, but that's what I did. It took years to get over the problems it caused, I still suffer tinnitus. The first question I was asked when seeing a hearing specialist was "Are you suicidal?", my response was, "more homicidal". I know the EPA has no regulations for infra-sound or scalar wave pollution. I also know the test for safe levels of noise pollution were fraudulent with my last case. So am I objecting on deaf ears?.	Low concern	Low concern	High concern	Moderate concern	Low concern	Low concern	High concern	Moderate concern	High concern	Ensure the supply meets the demand. It's not going anywhere while in the ground, best storage for it. Add extra fees for non purchase of agreed supply for re-distribution, sell it cheaper to the next available customer.	No

3	3915	Myself	I support the proposal	I think it is an exceptional way of utilising the over abundant wastage.	Low concern	Low concern	Low concern	Low concern	No concern	Low concern	No concern	Low concern	Low concern	None	No
4	3199	Other organisation or entity - Planet earth	I object to the proposal	<p>Why are you continuing to ignore the climate science ?</p> <p>Which clearly has been saying for a very long time</p> <p>LEAVE THE GAS AND COAL IN THE GROUND</p> <p>Stop putting the life of all things on this planet in grave danger</p>	High concern	High concern	High concern	High concern	High concern	High concern	High concern	High concern	High concern	End the project	No
5	3919	Myself	I object to the proposal	I have written a submission that will be attached and emailed to EPA Victoria and Esso.	High concern	High concern	High concern	High concern	Moderate concern	Moderate concern	High concern	Moderate concern	High concern	<p>Esso needs to find alternate solutions for excess ethane that it produces.</p> <p>Burning ethane is not a suitable solution due to increased greenhouse gas emissions and other air pollutants on the Mornington Peninsula.</p>	Yes - I have emailed them to permissioning_engagement@epa.vic.gov.au

6	3927	Myself	Undecided	<p>I do not think there has been effective community consultation on this proposal and its implications and i would like Esso to conduct a proper community forum. The consultation process did not include one environmental group including Save Westernport which has a very strong community presenece in the area. The proposal should not be approved until such a consultation has been undertaken including implications for reduction in greenhouse gases or othwise. The EPA should have a representative present to answer specific questions.</p> <p>I would also like to say that the EPA should have a monitoring station at this site (ESSO - Long Island Point) to ensure independent emissions assessments are undertaken and reported and I will be making representations to this effect to the Minister.</p>	High concern	Unsure	Unsure	High concern	Moderate concern	Unsure	Unsure	Moderate concern	High concern	<p>See above</p> <p>The proposal should not be supported until effective community consultation with concerned groups is undertaken and those concerns are alleviated and if not alleviated further time be given for additional submissions.</p> <p>As also stated it is essential that an EPA monitoring station is set up in this area.</p>	No

EPA acknowledges Aboriginal people as the first peoples and Traditional custodians of the land and water on which we live, work and depend.

We pay respect to Aboriginal Elders, past and present.

As Victoria's environmental regulator, we pay respect to how Country has been protected and cared for by Aboriginal people over many tens of thousands of years.

We acknowledge the unique spiritual and cultural significance of land, water and all that is in the environment to Traditional Owners, and recognise their continuing connection to, and aspirations for Country.
